Work Experience

05.2019 - 09.2019

Remote, Argentina

Techona

Software Engineer

10.2019 - 12.2019

Prague, Czechia

- Casino games development, using an internal JavaScript framework of the company. It was a wrapper for Pixi JS, and used Google Closure Library to enable modularity
- Worked mostly as a Frontend Game Developer, using JavaScript to create new games based on the company's framework
- Coded a tool that created Jira tasks in bulk, based on a template. In handled task hierarchy and let the user manage the whole project from Excel. Coded using VSTO with C#

07.2018 - 08.2019

Buenos Aires, Argentina

The App Master

Senior Software Developer

- Reengineering for the platform of one of the main online theater ticket sellers in argentina.
- Worked as part of a 2 developers team, participating in all the stages of the project, including: Project planning, create Database scripts, project structure, infrastructure, and more. The solution consisted on 3 projects, one of them was a Back Office application made using JQuery and ASP.NET MVC, with .NET Framework 4.7.2. Another was a REST API made using .NET Core, which shared .NET Standard libraries with the Back Office. And lastly, the Frontend was made using Vue.js.
- Implemented Continuous Integration using Jenkins as a Build Server, thus improving release times by 90%, compared to the old FTP release process.

07.2017 - 07.2018 Buenos Aires, Argentina	Hexacta Semi-Senior Software Developer	<ul style="list-style-type: none"> Developed internal tools for an US company specialized in risk management solutions for the workers' compensation, auto, health and disability management industries As part of a team of 3 developers, I worked on a ASP.NET WebForms project that handled most of its logic in Stored Procedures. Most of the development was made in SQL Responsible of the Frontend of a new project that handled bulk data loading into SQL Server databases, hosted in Azure, to later on be replicated to physical databases in the client's offices. The solution was made with ASP.NET Core MVC, Entity Framework Core, Kendo UI and TypeScript, everything hosted on Azure
01.2017 - 07.2017 Remote, Venezuela	Freelancer Semi-Senior Software Developer	<ul style="list-style-type: none"> Created a proof of concept of Microsoft Bot Framework and C# for SiderysBSN. It integrated with Outlook and set up meetings for the user only using Skype Implemented Twilio video calls between Mobile and Web for a startup named HLink iFarmacias. The solution was made using ASP.NET MVC and JQuery
